Reading about Science

Read the story. Then, answer the questions.

Floods

Rain is good for people and plants, but when it rains too much, people may be in danger. A flash flood occurs when a lot of rain falls very quickly, filling up the streets faster than the water can drain away. It is very dangerous to drive in a flash flood, because your car may be swept away. If you live in an area where flooding is likely, listen to the radio or television when it starts to rain. Be ready to leave your home if the newscaster tells you to move to a higher location. Before you leave, turn off all electrical equipment. Move important items to a higher floor, if possible. If you leave on foot, do not walk through moving water. Do not drive through standing water unless it is less than six inches (15.24 cm) deep. After a flood, listen to news reports to find out when you can return home and when the water from your tap will be safe to drink.

1. What is the main idea of this story?
 - a. Flash floods can be dangerous and happen suddenly.
 - b. Never drive through a flooded area.
 - c. Take important items with you when you leave your home.
2. What happens during a flash flood?

3. What could happen to a car in a flash flood?

4. When should you leave your home?

5. What should you do before leaving your home?

6. What should you do after a flood?

Health and Fitness

Health and fitness are very important for young people. If you start good habits now, you have a better chance of being a healthy adult later. You may go to gym class several times a week, but you should also try to stay fit outside of school. You and your family can make healthy choices together. You can choose fresh fruit for dessert instead of cake. Offer to help make dinner one night and surprise your family by preparing a delicious salad. You can go for a walk together after dinner instead of watching television. Exercising can help wake up your brain so that you can do a good job on your homework. Making healthy choices may seem hard now, but after a while it will feel good.

1. What is the main idea of this story?
 - a. Going to gym class is fun.
 - b. Making healthy choices is too hard.
 - c. Health and fitness are important for you and your family.

2. What might happen if you start good habits now?

3. Where should you try to stay fit?

4. What is a better choice than cake for dessert?

5. What can you do instead of watching TV after dinner?

6. How does exercise affect your brain?

4. He caught the ball and ran for a touchdown. _____
5. We waited in line, then went into the theater and sat down. _____

Name _____

Read the story. Then, answer the questions.

The Continents

Earth is divided into seven large areas of land called continents. The seven continents are Asia, Africa, Australia, Europe, Antarctica, North America, and South America. Each continent is separated from the others by a feature such as an ocean or a mountain range. Continents may be divided into many different countries, states, or provinces. People live on six of the seven continents. The continent of Antarctica is at the South Pole, where the weather is too cold for people to live. Some scientists study in Antarctica at special stations, but many stay there for only part of the year. The largest continent is Asia, which covers over 17,000,000 square miles (44,000,000 square km). The smallest is Australia, which covers nearly 3,000,000 square miles (7,700,000 square km). Asia also has the most people, with a population of over three billion. That accounts for about half the world's people!

1. What is the main idea of this story?
 - a. More people live in Asia than on any other continent.
 - b. It is hard for people to live in Antarctica.
 - c. Continents are large areas of land on Earth.

2. List the seven continents.

3. What separates continents from each other?

4. What is a *station* in the story?
 - a. a place where scientists study
 - b. an area of the classroom
 - c. a television channel

5. About how much bigger is Asia than Australia?

6. Why do you think that so many people live in Asia?

Just for Fun

Choose an occupation from the list, and write a short story about a special or unusual day in the life of that person.

Name _____

Reading about Science

Read the story. Then, answer the questions.

Tornadoes

A tornado is a funnel cloud that forms over land. It is created when warm air meets cold air, making a thunderstorm. Tornadoes can be very dangerous to both people and things. They can leave a trail of damage one mile (1.6 km) wide and 50 miles (80 km) long. The wind speed can reach over 300 miles (480 km) per hour. People often have little warning of a tornado, but certain parts of the United States have tornadoes more frequently than other parts. The area called "Tornado Alley" covers parts of Texas, Oklahoma, Kansas, Nebraska, Iowa, and South Dakota. Tornadoes are more likely to form in the spring and summer. If the weather reporter says that a tornado has been spotted in your area, stay inside. Go to the lowest level of your home, keep as many walls as possible between you and the outside, and keep the windows closed. Do not leave until you hear that the tornado has passed.

1. What is the main idea of this story?
 - a. Tornadoes are formed during thunderstorms.
 - b. Tornado Alley is an area where many storms occur.
 - c. Tornadoes are dangerous to people and buildings.
2. What is a tornado?

3. How far can the damage from a tornado reach?

4. What are three states that are found in Tornado Alley?

5. When are tornadoes more likely to form?

6. What should you do if a tornado is spotted in your area?

Name the place value of each underlined digit.
Circle the letter in the matching column.

A cartoon illustration of a library building. The building is a trapezoid with a dark, textured roof. A sign on the front reads "LIBRARY" in bold, capital letters. Below the sign is a smiling face with large, round eyes and a wide, open mouth. The lower part of the building features a grid of windows, each containing diagonal lines. The building is set against a background of stylized clouds.

To solve the riddle, write each circled letter from above on its matching line or lines below.
